Accepted by the MAG Regional Council, June 25, 2003

MAG Caveats for Interim Projections

1. The interim projections by Municipal Planning Area (MPA) and Regional Analysis Zone (RAZ) were prepared to be consistent with the April 1, 2000 Census and have been prepared for July 1 of the following years: 2010, 2020, 2025 and 2030.
2. The interim population projections are for resident population only and do not include nonresident seasonal or transient population.
3. Because the Arizona Department of Economic Security has not yet developed or approved new county population control totals, MAG has developed these interim projections using interim Maricopa County population and employment control totals. These control totals are based upon work done by Arizona State University and the University of Arizona to develop a long-range economic strategy for the state, augmented by information from the regional model from Regional Economic Models, Inc. (REMI). These control totals were accepted by the MAG Population Technical Advisory Committee (POPTAC) in March 2003 and the Management Committee and Regional Council in April 2003. The control totals have been modified for these interim projections to reflect the reduction in population in one MPA based on water availability.
4. Official MAG population projections will be developed subsequent to DES approval of official population control totals.
5. The interim projections by MPA and RAZ were recommended for acceptance by the MAG POPTAC on April 29, 2003. The interim projections were recommended for acceptance by the Management Committee on June 11, 2003, and were accepted by the Regional Council on June 25, 2003.
6. The interim projections include the Maricopa County portion of Peoria, Queen Creek and the Gila River Indian Community only.
7. The interim projections were based upon each MAG member agency's latest version of its future land use plan. Where jurisdictions have not yet adopted their land use plan, or have amendments to their plan, changes may result in and require changes to the projections.
8. The databases and assumptions upon which the interim projections are based have been reviewed by MAG member agencies, revised by MAG staff based on input received and approved by members of the MAG POPTAC.
9. The interim projections are based upon previous review and local insight by members of the MAG POPTAC.
10. The "other" employment category includes work-at-home and construction employment. Because construction employment follows development, employment projections may show declines in future years.
11. The interim projections should be used with caution. They are subject to change as a result of fluctuation in economic and development conditions, local development policies and updated data.
